Professional Summary

Software Engineering student at FIAP with experience in front-end development and API integration using React, Next.js, and TypeScript. Interested in software development, modern user interfaces, data, automated testing, and digital solutions for real-world problems. Looking for opportunities to grow technically, contribute to impactful projects, and expand my experience in front-end, back-end, and systems fundamentals.

Professional Experience

Front-End Developer Freelancer | Westpoint | 03/2025 - 05/2025

- Developed responsive and accessible interfaces with React, Next.js, and TypeScript, focusing on usability and user experience.
- Integrated REST APIs into the front-end for efficient data consumption and dynamic interface updates.
- Implemented end-to-end tests with Cypress to validate critical application flows.
- Collaborated with designers in Figma, turning layouts into reusable components.

Technologies: Next.js, TypeScript, Mantine, Cypress, Figma, AWS

Projects

HTTP_FS | github.com/VitorCesarinoMarchese/HTTP_FS

Experimental HTTP server written in C as a study project focused on low-level programming, networking, and systems fundamentals.

- Worked with sockets, HTTP, strings, file handling, and modular code organization in C.
- Developed independently, using AI only for research and error explanation.

Technologies: C, Linux, HTTP, Sockets, Git

Exchange of Currencies | github.com/VitorCesarinoMarchese/Exchange_of_Currencies

Real-time currency conversion platform between GBP and USD.

- Developed an interactive interface with Next.js and TypeScript.
- Implemented dynamic data updates using WebSockets.
- Structured reusable and typed components to improve front-end scalability.
- Created interface tests with Vitest and integrated external financial data APIs.

Technologies: Next.js, TypeScript, Vitest, WebSockets, REST APIs, JWT

Technical Skills

- **Programming Languages:** TypeScript, JavaScript, HTML, CSS, C
- **Front-End:** React.js, Next.js, Mantine, UX, Responsive Design
- **Back-End:** Node.js, Express, REST APIs, JWT
- **Databases:** MongoDB, SQL
- **Testing:** Cypress, Vitest
- **Tools:** Git, GitHub, Postman, Figma, Jira, AWS, Linux
- **Methodologies:** Scrum
- **Spoken Languages:** Portuguese native, English fluent

Education

FIAP | Bachelor's Degree in Software Engineering | 2024 - 2027

FIAP School | Technical High School focused on Web Development | 2021 - 2023
